Lesson Plan 03, ISTA-322 Cohort 3

Chapter 3, Professional ASP.NET MVC 5

September 20, 2017

1   Discussion Questions

Chapter 3, Pages: 49 — 74

1. What is a *view*?

2. What is the similarity between view names and controller names? What is the difference between the two?

3. Where in the directory structure of an ASP.NET MVC application do views live?

4. What is a *ViewBag* object? What does it do?

5. What does the at symbol (@) do? Can you excape it? If so, how?

6. What are *view conventions* and how do they work?

7. What is a *ActionResult* object? How do these objects interact with views?

8. What are *strongly typed* views?

9. How does Razor combine HTML and C# code?

10. Where do *layouts* live in the directory structure of an ASP.NET MVC application?

11. What are the differences between a *partial view* and a "full view?"
