# Lesson Plan 02, ISTA-322 Cohort 3

## Chapter 2, Professional ASP.NET MVC 5

### September 19, 2017

## 1 Discussion Questions

Chapter 2, Pages: 31 — 48

1. What is a *controller*? What does it do?

2. Explain the relationship between URLs and controller methods.

3. What does it mean to say that, "The web is stateless?"

4. Where in the directory structure of an ASP.NET MVC application do controllers live?

5. What programming constructs do controllers contain?

6. Where are *action methods*? What do they do?

7. What are *query parameters*?

8. How do action methods receive HTTP query parameters?
